## **SCOTTY'S CONTRACTING & STONE LLC WINS NATIONAL AWARD FOR QUALITY IN ASPHALT PAVING**

Lanham, Md. — The National Asphalt Pavement Association (NAPA) announced today that Scotty's Contracting & Stone LLC of Bowling Green, Ky., has won a 2014 Quality in Construction Award for excellence in construction of an asphalt pavement. The company received its award on Wednesday, Jan. 28, at a ceremony during the association's 60th Annual Meeting in Marco Island, Fla.

"Quality pavements are something every road builder strives to construct. We want to build pavements that deliver on the promise of high performance and drivability for the public," said William C. Ensor III, NAPA 2014 Chairman. "Projects that earn a Quality in Construction Award have been measured against industry best practices designed to live up to that promise. I'm proud to say that, in earning a 2014 QIC Award, Scotty's Contracting & Stone LLC has met or exceeded these rigorous quality standards."

Scotty's Contracting & Stone won the award for its work on the National Corvette Museum's motorsports park track and autocross skid pad. The project included construction of a 3.15-mile course plus a 22-acre paddock area. The company looked at every aspect of the asphalt—mix design, liquid asphalt, paving, aggregate source and smoothness—to ensure a smooth, durable pavement with the proper grip and tire wear characteristics. Using innovative techniques, it produced a high-quality pavement.

###

The National Asphalt Pavement Association (NAPA) is the only trade association that exclusively represents the interests of the asphalt producer/contractor on the national level with Congress, government agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. The association provides technical, educational, and marketing materials and information to its members; supplies product information to users and specifiers of paving materials; and conducts training courses. The association, which counts more than 1,100 companies as members, was founded in 1955.
